

<b>Course title: Globalization of World Economy and Transition</b>		
<b>Lecturer: Miroslava Filipović</b>		
<b>Course status: Required , Second Semester</b>		
<b>ECTS: 12</b>		
<b>Requirements:</b>		
<b>Course aims:</b> The aim of this course is to introduce the students to modern processes on the international economic scene, such as globalization, market liberalization, regional economic integrations, economic-systematic transformation, etc. It encourages analytical research work on the part of the students in the area of studying modern trends of the international economic environment, with a focus on international competitiveness and the problem of integrating small, open economies into international currents.		
<b>Course outcome</b> The gaining of knowledge necessary for the analysis of modern economic currents, i.e. understanding globalization liberalization integrations and interdependence in the international exchange of goods and services. At this course, the students will gain knowledge on the factors that influence the improvement of competitiveness and of the general business conditions. The course is intended for the students whose focus of interest is in the area of international economy, economic integrations, as well as those that aim to become the makers of economic policies, thereby contributing to the improvement of the competitiveness of the national economy.
