

<b>Course title: Finance</b>			
<b>Lecturer: Goran Andelić</b>			
<b>Course status: Required, Third Semester</b>			
<b>ECTS: 8</b>			
<b>Requirement: none</b>			
<b>Course aims</b> Acquisition of basic knowledge of finance and financial operations.			
<b>Course outcome</b> Students acquire theoretical and practical knowledge in the field of finance and financial operations. From theoretical, scientific and practical knowledge, the students are trained to analyze and synthesize, and create professional opinion, especially in the financial analysis. Students learn the importance and significance of banks and other financial institutions for the uninterrupted functioning of the economy. Also, students will learn what is the subject of the science of finance, the place, the importance and the role that the financial function has in a company, what are the goals and objectives of the financial function of the company, how much of funds the company needs to have, what kind of means the company should obtain, how the necessary funds should be financed, and more, all with the goal of utilizing knowledge acquired in this field of professional work, as well as further professional development.
