

<b>Course title: International economic relations</b>			
<b>Lecturer: Miroslava Filipović</b>			
<b>Course status: Required, Sixth Semester</b>			
<b>ECTS: 8</b>			
<b>Requirements: none</b>			
<b>Course aims:</b> The course gives an overview of traditional and modern theories of international economic relations, as well as sources, agents and formulas that determine them. The course looks at the agents and indicators in the process of globalization, the main factors that determine contemporary economic relations through three main segments: international commerce, monetary relations and movements of capital. The course looks at the main areas of forging international relations, with a focus on modern problems and agents in the field of monetary relations and finance, including interstate and private agents.			
<b>Course outcome:</b> Students will be able to recognize the factors, processes and agents in the area of international relations. Also, they will be able to identify the main trends in globalization of the world economy, and to apply the approaches to conceptualization of the modern reality in the area of international economic issues. Students will also gain skills for independent research and collecting data, but also for team work.
