

Study programme: Applied Security			
Course title: Management in criminal investigations			
Lecturer: Nedžad Korajlić			
Course status: Elective			
ECTS: 12			
Requirement: /			
Course aims Management in criminal investigations is the subject of an interdisciplinary character, established on the triple border of three scientific disciplines, including management, criminal tactics and criminal procedural law. The purpose of this course is to establish the general principles of a systematic approach to the investigation of criminal offenses, taking into account the order of taking certain actions, their type and extent, and the timeframe of implementation of actions and measures during the criminal investigation. The objective of the course is that students master the basic management techniques, as well as the basic concepts and principles of criminology, in order to be able to monitor and study not only the criminalistics but also the related disciplines in this study. Management of criminal investigations implies management, supervision and supervision in the criminal-legal system. Management in the criminal system refers to police, security and security procedures, with the application of criminological, legal, sociological, psychological and other doctrines. The criminal system includes police officers, investigators, judicial officers, officers of penitentiary institutions, as well as all other police administrative personnel and security personnel. In the study, special emphasis is on the management of human, material and intellectual potential in criminal investigations.			
Course outcomes The outcome of this course is the establishment of a scientific approach to criminal investigation as a process and a dynamic process. Management as a science discipline within this subject aims to accurately identify the steps and actions that need to be taken. Given the goals set, students are expected to master the basic management techniques, i.e. basic concepts and principles of criminology, in order to be able to monitor and study not only criminalistic but also related disciplines in this study.
