| Study programme: Security studies |
| :--- |
| Course title: Informatics |
| Lecturer: Velimir Dedić |
| Course status: Reuquired |
| ECTS: 7 |
| Requirement: None |
| Course aims |
| Acquiring basic necessary theoretical and practical knowledge on the application of information technologies. |
| Course outcme |
| Students will be able to define, understand and recognize basic technical terms related to the modern IT system. |
| Students will be able to define, evaluate, and suggest the application of information generated by data processing. |
| Students will be trained to properly categorize computers, software and networks. They will be able to identify the |
| basic needs of an IT organization and propose ways to meet these needs. |
| Couse content |
| Theory classes |
| Introduction to computing and informatics, information, information measurement, data processing, generation and |
| category of computers, input units, output units, microprocessors and busbars, memory, system software, |
| application software, networks and telecommunications, digitization, Chenon's theorem, computer networks, types |
| of network, networked, internet. |
| Practice classes |
| Passing terms from lectures, case studies, laboratory work with mastering standard word processing program and |
| create presentations and collaborative work (Word, Excel, Google Drive). |

## Literature

1. Dedič, V. Informatika, scripts, 2016.
2. Turban: Uvod u informacione sisteme, Datastatus, 2009.
3. David Evans: Introduction to Comuting, University of Virginia, USA, 2011.

| $\begin{array}{l}\text { Number of active teaching classes: } \\ 4\end{array}$ | Theory classes: 2 | Practice classes: 2 |
| :--- | :--- | :--- |

Teaching methods
Lectures and laboratory exercises.

| Knowledge assessment (max 100 points) | Points | Final exam | Points |
| :--- | :---: | :---: | :---: |
| Pre-exam tasks | 10 | Written exam |  |
| In-class activity |  | Oral exam | 30 |
| Practice classes | 60 | $\ldots \ldots \ldots .$. |  |
| Mid-term tests |  |  |  |
| Seminar papers |  |  |  |

The above listed knowledge assessment means are just a few among different options (written exam, oral exam, project presentation, seminar papers etc)
