

Study programme: Security studies			
Course title: National security			
Lecturer: Samed Karović			
Course status: Required			
ECTS: 7			
Requirement: None			
Course aims Acquiring basic knowledge and skills for independent and critical approach to the security of individuals, of the state and the international community, as well as mastering the knowledge of implementation of management approach in the study of security phenomena.			
Course outcome Understanding the basic concepts of causes as well as the consequences of different forms of threatening phenomena, as well as the measures and activities to be done by the state and individual in their elimination - from the national and general aspects of security.			
Course outcome <i>Theory classes</i> In this part of the course, students are introduced to the theoretical and methodological characteristics of the management approach to national security. This includes the study of theoretical convergence of management and concepts of security as well as the model of the application of theoretical knowledge in practice. The model of national security management includes familiarization with institutional, human and social resources to improve national security in the light of the work of civil society institutions of the society and public administration institutions. System security of our country - theory, structure, security measures. Security - intelligence services of our country. <i>Practice classes</i> In the practical part of teaching, they apply the adopted theoretical knowledge in analyzing the institutional reform of the society, especially in the field of national security.			
Literature 1. Mijalković S: Nacionalna bezbednost, Kriminalističko-policijska akademija, Beograd, 2015. 2. Savić A: Nacionalna bezbednost, Kriminalističko-policijska akademija, Beograd, 2007. 3. Prabhakaran Paleri: National Security: Imperatives and Challenges, Tata McGraw-Hill Education, 2008.			
Number of active teaching classes: 4		Theory classes: 2	Practice classes: 2
Teaching methods Teaching takes place through lectures and exercises. Exercises are auditory and practical, students solve tasks from individual chapters, provide additional explanations, and, for example, elaborate individual areas of theoretical knowledge. During the course, student is obliged to perform the planned exercises. Knowledge testing takes place through two colloquiums. The condition for the final exam is that the student places both colloquiums and successfully exercises. The final exam consists of an oral exam.			
Knowledge assessment (max 100 points)			
Pre-exam tasks		Points	Final exam
In-class activity		10	Written exam
Practice classes			Oral exam
Mid-term tests		50
Seminar papers			40
The above listed knowledge assessment means are just a few among different options (written exam, oral exam, project presentation, seminar papers etc)			
* Maximum one page A4 in length
